Safe Flow Lid™ For 1 Gallon Jugs

MODEL # 709101

OVERVIEW

Safe Flow Lids™ provide safe and convenient dispensing of chemicals from 1 gallon containers. The threaded lid keeps out contaminants, reduces odors and prevents chemical splashing and spillage. These unique, heavy-duty, machined polypropylene lids attach to chemical suction tubes with a 1/4" hose barb and can be quickly unscrewed and attached to another container or easily removed and stored. Includes a strainer and suction assembly to place inside the chemical container. Available with various lid threads.

Safe Flow Lid™ for 1 Gallon Jugs

- Rugged, machined, polypropylene Safe Flow Lid™ with 14" of 1/4" flexible suction tubing and Hastelloy strainer
- 1/4" hose barb connects directly to a suction tube to facilitate dispensing
- Quickly unscrews from one jug and attaches to another to quickly replace an empty chemical container
- Safe and convenient way to prevent contaminants from getting into the chemical and to reduce odors
- Minimizes the risks from splashing and spillage
- #709101 is custom threaded to fit most 1-gallon jugs
- #709101-R fits Rieke Flexspout Closures
- #709101-M fits 1-3/4" Delta Caps (commonly used on metal jugs)
