

Lafferty Hose Drop Stations™

High Pressure 400-1000 PSI

Lafferty Sanitize / Rinse / Foam Hose Drop Stations provide food plant sanitation crews the effectiveness of foam cleaning, sanitizing, and rinsing from one convenient station. Lafferty foamer and sanitizer bodies are machined out of stainless steel offering durability and superior chemical resistance. The compressed air foamers produce rich, clinging foam for more effective cleaning. The foamers and sanitizers draw chemical concentrate directly from original shipping containers, reducing employee exposure to chemicals. Twenty color-coded metering tips provide consistent chemical dilution ratios, ensuring chemical effectiveness. The all-in-one design conserves space and saves on plumbing and installation costs.

Features And Benefits

- Venturi action
- Stainless steel base with hinged cover
- Stainless steel foamer body
- Stainless steel sanitizer body
- Metering tips
- Two 50' hose assemblies
- Sanitize/rinse assembly includes a quick disconnect hose, a trigger gun, 18" stainless steel wand, and nozzle
- Foam assembly includes a dedicated hose, an open flow polypropylene wand and fan nozzle

Options

- Stainless Steel Hose Rack
- 1 Gallon Stainless Steel Jug Rack (round or square)
- 2½ Gallon Stainless Steel Jug Rack (inside dimensions 8½" x 10½")
- 5 Gallon Stainless Steel Jug Rack (inside dimensions 12" x 12")

Models:

W-20SS / Rinse / HPSS
HDS Complete.....# 918227

Requirements:

- 400 – 1000 PSI Water
- Compressed Air
- Water Temperature to 160°F

Other styles available: Rinse / Foam and Chemical / Rinse.
