

Lafferty EZ-Link

Lafferty EZ-Link™ is a simple and effective way to display Lafferty products on your website, without the requirement of added maintenance or content management. With EZ-Link, you will always have the latest product information because our website and yours will be linked together. With your website “pulling in” the correct images, specs, requirements and features from ours, you will only need to setup EZ-Link once and let Lafferty do the rest.

Display Lafferty’s full product line or work with our Webmaster to display a more focused product offering. We will work with you to deliver the design elements and content you want.

Go to <http://www.laffertyequipment.com/ez-example.html> to view a live version of the EZ-Link product display engine. This engine can be customized to fit the design needs of your Website.

The “full product line” page below was designed for a maximum width of 780 pixels, with a left column of 186 pixels and a right column of 594 pixels. The left column is optional, but does aide in navigation, so we recommend that your Lafferty Product Page include the left column as displayed here.

Lafferty’s Webmaster can easily assist you with the design/implementation of this page. Once completed, the live content will display as shown in the link above. Select a product group from the left column or in the main frame on the right to load the appropriate product highlights section.

The Lafferty product sections load directly from our server into an “IFRAME” element within the source code of your HTML page.

Foam Clean, Rinse and/or Sanitize from One Convenient Station

Lafferty Hose Drop Stations™ (HDS) help provide food plant sanitation crews the effectiveness of foam cleaning, rinsing and/or sanitizing from one convenient station.

<< Return To Main HDS Menu >>

1035 Sanitize / Ultimate Foam Hose Drop Station (Wall Mount / Compressed Air Required) – 35 to 100 PSI

Benefits:

- For foam cleaning and flood sanitizing large areas and equipment
- Ultimate Foam:
 - Foams hard-to-foam chemicals and provides extra reach with 50 ft. discharge hose
 - Foam up to 500 sqft (46.45 sqm) in 1 ½ minutes
- 1035 Sanitize:
 - Accurately apply quaternary ammonia, chlorine, acid anionic sanitizer or detergent solutions
 - High water flow rate helps meter chemical down to "no-rinse" dilution ratios

Features:

- Machined polypropylene foamer and sanitizer bodies
- Chemical check valves
- Air check valve

Model:	Description:
914120	1035 Sanitize / Ultimate Foam HDS Complete

1035 Sanitize / Ultimate Foam Hose Drop Station Requirements / Specs:	
Compressed Air	4 scfm 113.28 Lpm
Water Pressure Range	35 - 150 psi 2.41 - 10.34 bar
Water Flow Rate	1.34 gpm @ 40 psi
Ultimate Foam	5.07 Lpm @ 2.76 bar
1035 Sanitize	8.8 gpm @ 40 psi 32.55 Lpm @ 2.76 bar
Discharge Hose ID	3/4" 19.05 mm
Standard Length	50 ft. 15.24 m
Nozzle Size	50250

There are three items needed for a successful implementation of Lafferty EZ-Link. They are:

- 1) A link to the Lafferty stylesheet placed between the <head> and </head> tags in the HTML document, as follows: <LINK href="http://www.laffertyequipment.com/includes/CSS/global.css" type="text/css" rel="stylesheet">
- 2) A table cell with sufficient space to accommodate the IFRAME content. Recommended size is 594 pixels, centered, with an IFRAME height of about 500 pixels. *The smallest possible IFRAME width is 480 pixels.*
- 3) Within the IFRAME, a hyperlink that points to our product display engine.

An example of the IFRAME code would be:

```

<!-- ----- BEGIN RIGHT (MAIN) PANEL/COLUMN ----->
<td width="100%" height="100%" align="center" valign="top" bgcolor="#FFFFFF">
<!-- -----BEGIN IFRAME CONTAINER TABLE ----->
<table width="99%" height="100%" border="0" cellspacing="0" cellpadding="0" align="center">
<tr><td bgcolor="#FFFFFF" width="100%" height="100%" valign="top" align="center">
<p><iframe name="ifr1" src="http://www.laffertyequipment.com/products/distributors/dist_prodview.php?view=browse-all"
width="100%" height="100%" marginwidth="0px" marginheight="15px" frameborder="0"></iframe>
</td></tr>
</table>
<!-- -----END IFRAME CONTAINER TABLE ----->
</td>
<!-- ----- END RIGHT (MAIN) PANEL/COLUMN ----->

```

The optional left column requires that the following javascript code be placed between the <head> and </head> tags of the HTML document, in addition to the html code for the left column itself:

```

<script type="text/javascript">
function ifr1(lnk){opener.document.ifr1.src=lnk;// or: opener.document.getElementById('ifr1').src=lnk;return false;}
</script>

```

In conclusion, Lafferty EZ-Link is a powerful tool that can help leverage a largely untapped resource. The Internet is still growing at an unprecedented rate and those of us who wait to see what the competition will do are risking much. Lafferty offers you a solution for providing the best chemical applicators in the industry to your customers, without having to endure the maintenance and accuracy woes that are normally an accepted burden to carry as a part of Internet content management.
