

Liberty & Freedom Systems

PORTABLE AND WALL-MOUNTED AIR PUMP OPERATED FOAMERS & SPRAYERS

Lafferty Liberty and Freedom Systems are powered by compressed air and are ideal for facilities without running water or where water pressure is unreliable. Systems are available for any sized cleaning job and include wall-mounted and portable configurations.

Core Features

- Locking stainless steel pump enclosure
- Balanced flow rate protects the pump and ensures optimal performance
- Adjustable foam consistency (wet/dry)
- Foamer and injector bodies machined in the USA
- Chemical-resistant wetted components and industrial strength design
- Choice of pump diaphragm material

Portable Options

- All-stainless steel cart and non-marking tires
- 20 gallon tank for maneuverability
- 40 gallon tank for longer run time (select models only)
- 60 gallon tank for maximum run time between fills
- Color-coded tanks and/or hoses (20 gallon models only)

LIBERTY SYSTEMS

Liberty Foamers

- ¼" Flojet AODD pump draws ready-to-use chemical and projects a medium volume of rich, clinging foam
- Foam throw distance up to 10 feet with standard fan nozzle
- All Liberty systems feature a quick-change pump bracket
- Available in low volume (LF) configurations

Liberty LC Foamers

- ¼" Flojet AODD pump draws water from a tank and dilutes chemical concentrate on-demand using an LC Foamer body
- Same overall foam performance and features as standard Liberty Foamers
- No chemical passes through the pump, making these units ideal for aggressive chemicals
- User can change chemical by swapping the container of chemical concentrate
- PRV models can regulate and boost low or fluctuating incoming water pressure

Liberty Sprayers

- ¼" Flojet AODD pump draws ready-to-use chemical and projects liquid spray in a fan pattern
- Includes stainless steel spray wand and 2 nozzles to project low or medium volume spray

FREEDOM SYSTEMS

Freedom 2.5 Foamers

- Heavy-duty ½" Sandpiper AODD pump draws ready-to-use chemical and projects a medium-high volume of rich, clinging foam
- Foam throw distance up to 15 feet with standard fan nozzle
- Available with two discharge hoses to allow for one or two users

Freedom XV Foamers

- Heavy-duty ½" Sandpiper AODD pump draws RTU chemical and projects a high volume of rich, clinging foam
- Foam throw distance up to 25 feet with standard zero degree nozzle
- Available with stainless steel 1" AODD pumps for even higher volume and longer range foaming
