

# FREEDOM

*FOAMER SERIES*

**Lafferty Equipment Manufacturing, Inc.**

[www.LaffertyEquipment.com](http://www.LaffertyEquipment.com)

## STANDARD

uses pre-mixed chemicals

Wall Mount  
Freedom Foamer Complete  
943105

Portable 2-wheel  
20 Gallon Freedom Foamer  
943180

Portable  
20 Gallon Freedom Foamer  
943182

Portable  
40 Gallon Freedom Foamer  
943184

Portable  
45 Gallon Freedom Foamer  
943185

# THE FUTURE OF FOAM

"MT" model - tank holds water  
only - no need to empty or rinse!

40' hose assembly with  
stainless steel shut off valve  
(50' with wall mount units)

heavy-duty, non-pressurized  
polyethylene tanks

comes standard with fan nozzle and a zero  
degree nozzle for increased foam throw

swivel casters

## THE NEXT GENERATION OF FOAM

## Portable 20 Gallon "MT" Complete 943382

rugged stainless steel construction  
on cart and enclosure

"MT" model - chemical ratios  
controlled by metering tips

"MT" model - change out  
chemicals easily and with no  
wasted product

### LAFFERTY'S BALANCED FOAMING SYSTEM

**Provides:**

- Higher quality foam
- Foam volume control
- Improved chemical management
- Extended application time
- Longer pump life - system keeps the pump from laboring

## What is a BALANCED FOAMING SYSTEM?

Lafferty's system begins with our unique, precision machined, polypropylene foamer bodies. The foamer body balances the entire system by regulating flow rate and synchronizing the mixing of water, chemical and air induction. We pair it with a rugged air operated pump so perfectly compatible that you'll see an ease of operation second to none. Our system also includes an optimized hose/wand assembly with precisely sized nozzles to ensure the finest quality of foam. These three basic operating components, combined with heavy-duty stainless steel carts and polyethylene tanks, deliver quality results without overworking the pump — creating the best performing foamer in the industry!
