

LAFFERTY EQUIPMENT

HAND HELD

AIRLESS FOAMERS & SPRAY-ALLS

Lafferty gives clear advantages

The Lafferty Hand Held **Airless Foamers** and Hand Held **Spray-Alls** give you distinct advantages over other hand-held applicators that have a small chemical bottle attached. Each Lafferty Hand Held Spray-All or Airless Foamer has an 8' flexible chemical tube. This lets you hold the applicator in one hand and the chemical container in the other hand, which allows you to select the size of container for more coverage between refills. Since the chemical is not attached to the applicator there is less weight and bulk to handle. Therefore, operator fatigue is reduced and solution can be applied easily in hard-to-reach areas. The polypropylene construction holds up to everyday use and chemical attack.

To use, simply attach the Lafferty Hand Held Spray-All or Airless Foamer to any standard garden hose and apply chemical anywhere the hose will reach. Add the optional spray gun and quick disconnect fittings for fast removal of the applicator for instant rinsing or to easily switch between the foamer and the Spray-All.

Lafferty Hand Held Spray-Alls and Airless Foamers include models for general use, for corrosives applications, and higher flow models that let you clean or sanitize larger areas quickly. The variety of applications for Lafferty Hand Held applicators is too numerous to list.

Hand Held Airless Foamers

Model 27 - # 969427

Model 47 - # 969447

Hand Held Spray-Alls

Model 20 - # 969020

Model 100 - # 969100

LAFFERTY EQUIPMENT

HAND HELD AIRLESS FOAMERS & SPRAY-ALLS

Models include:

- Selected Spray-All or Foamer
- Garden hose fitting
- PVC Chemical check valve
- Metering tips (set of 20)
- 8' chemical tube with strainer
- Fan Nozzle (Spray-Alls only)

Description	Special Features	Model #
Hand Held Airless Foamers		
Model 27		969427
Model 29 Extended	28" Extension wand; PVC ball valve, 10' chemical tube	969429
Model 47		969447
Model 49 Extended	28" Extension wand; PVC ball valve, 10' chemical tube	969449
Hand Held Spray-Alls		
Model 20		969020
Model 22 Extended	28" Extension wand; recessed PVC nozzle; PVC ball valve; 10' chemical tube with strainer	969022
Model 100		969100

Requirements: Water pressure 35 to 100 PSI

Water Flow Rates (@ 40 PSI)

Models 27 & 29.....	1.42 GPM
Models 47 & 49.....	2.10 GPM
Model 20.....	0.81 GPM
Model 22.....	0.61 GPM
Model 100.....	3.93 GPM

Options

- Spray gun.....#320423
- QD Plug (MGH).....#350472
- QD Socket (FGH).....#350474
- End cap screen.....#536690
for richer foam and reduced foam throw
- Stainless Steel chemical check valve.....#491324
(Replaces PVC check valve for more rugged use)
- Hose (1/2" ID) with garden hose fittings
 - 25'.....#804425B
 - 50'.....#804450B
 - 75'.....#804475B
 - 100'.....#804499B

Corrosive Chemical Options

For added safety with corrosive chemicals, put extra distance between the operator and the chemical discharge. The extended versions of the Lafferty Hand Held Spray-All and Hand Held Airless Foamer are 28" longer and include a PVC ball valve. The Spray-All also includes a corrosive resistant PVC nozzle that is recessed for protection.
