

Stainless Steel Foamers & Sprayers for Pressure Washers

5614 Oak Grove Road • North Little Rock, AR 72118
Phone: 800-999-2820 / 501-851-2820 • Fax Orders: 800-699-3719

LAFFERTY EQUIPMENT MANUFACTURING transforms your pressure washer into a chemical applicator with the added cleaning power of foaming and spraying of chemicals. Foaming increases the chemical's effectiveness by greatly increasing the contact time.

Lafferty applicators are machined from durable stainless steel for superior chemical resistance and performance.

Combo Airless Foamer / Sprayer Kits are machined stainless steel venturi injectors that quick connect to the discharge of the pump and include a venturi foam wand and a spray nozzle that quick connect to the trigger gun. Designed for pressure washers that are NOT equipped with a downstream chemical injector.

STAINLESS STEEL COMBO AIRLESS FOAMER / SPRAYER KITS

Offering convenient versatility, Combo Airless Foamer / Sprayer Kits are machined stainless steel venturi injectors that quick connect to the discharge of the pump and include a venturi foam wand and a spray nozzle that quick connect to the trigger gun. Designed for pressure washers NOT equipped with a downstream chemical injector.

These kits come with everything needed for injecting chemicals using a pressure washer. Metering tips for accurately setting the chemical dilution ratio, quick connect fittings, clear tubing, and strainer are all included

- The injector draws chemical concentrate from any chemical container and dilutes it to the required ratio.
- Select the stainless steel airless foam wand to instantly create wet clinging foam.
- Select the stainless steel spray nozzle to spray non foaming chemicals.
- Two foam nozzles included, fan pattern for quick coverage close up and zero degree for distance
- Ideal for applying stronger or more aggressive chemicals as no chemical passes through the pump.
- Chemical concentrates can be dispensed from original containers.
- Foam throw up to 30 ft.
- Choice of two models.

Principals of Operation

- Quick connect the stainless steel injector downstream of the unloader, which is downstream of the pump. Refer to the arrow on the injector body for proper flow direction. (3/8")
- Quick connect the hose to the discharge of the injector (3/8")
- Install metering tip for desired chemical dilution ratio.
- Place the pick-up tube into chemical concentrate
- To foam, quick connect the airless foam wand to the trigger gun.
- To spray, quick connect the nozzle to the trigger gun.

REQUIREMENTS / SPECIFICATIONS

Water Flow Rate	minimum 1000 psi	68.9 bar
Model 10	2 to 4 gpm	7.6 to 15.1 lpm
Model 20	over 4 gpm	15.1 lpm

Model #	Description
969710	Model 10 SS Combo Airless Foamer/ Sprayer Kit
969720	Model 20 SS Combo Airless Foamer/ Sprayer Kit

Hose End Airless Foamers & Sprayers are machined stainless steel venturis that quick connect to the trigger gun and draw chemical and air to create clinging wet foam or a chemical spray. Designed for pressure washers that are NOT equipped with a downstream chemical injector. Can apply more aggressive chemicals since no chemical passes through the pump, hose or trigger gun.

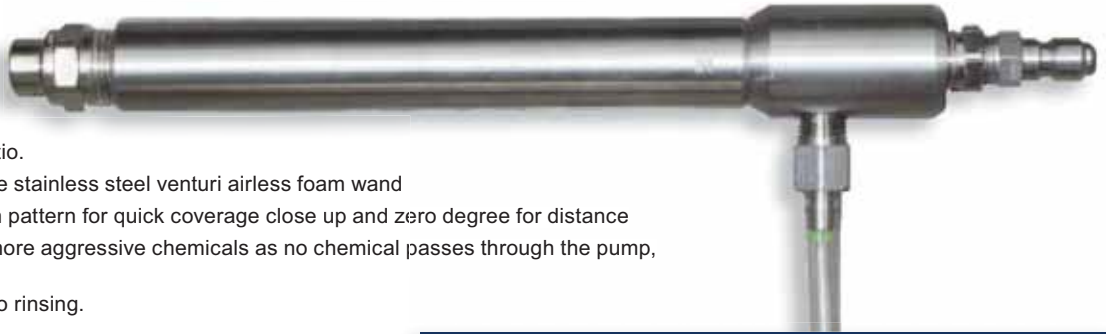

STAINLESS STEEL HOSE END AIRLESS FOAMERS & SPRAYERS

Hose End Airless Foamers & Sprayers are machined stainless steel venturis that quick connect to the trigger gun and draw chemical from any container. Designed for pressure washers NOT equipped with a downstream chemical injector.

These applicators come with everything needed for injecting chemicals using a pressure washer. Metering tips for accurately setting the chemical dilution ratio, quick connect fitting, tubing, and strainer are all included.

Hose End Airless Foamers

- Draws chemical concentrate from any chemical container and dilutes it to the required ratio.
- Foam is created instantly by the stainless steel venturi airless foam wand
- Two foam nozzles included, fan pattern for quick coverage close up and zero degree for distance
- Ideal for applying stronger or more aggressive chemicals as no chemical passes through the pump, hose or trigger gun
- Quickly change from foaming to rinsing.
- Foam throw up to 30 ft.
- Choice of two models

Model #	Description
969610	Model 10 SS Hose End Airless Foamer
969620	Model 20 SS Hose End Airless Foamer

Hose End Sprayers

- Draw chemical concentrate from any chemical container and dilutes it to the required ratio.
- Fan pattern for quick coverage close up, remove the nozzle for distance
- Ideal for applying stronger or more aggressive chemicals as no chemical passes through the pump, hose or trigger gun
- Quickly change from spraying to rinsing.
- Choice of two models

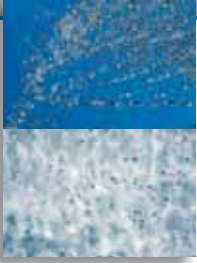

Model #	Description
969510	Model 10 SS Hose End Sprayer
969520	Model 20 SS Hose End Sprayer

Principals of Operation

- Quick connect the airless foamer or the sprayer to the trigger gun
- Install metering tip for desired chemical dilution ratio
- Place chemical tube into chemical concentrate

REQUIREMENTS / SPECIFICATIONS

Water Flow Rate	minimum 1000 psi	68.9 bar
Model 10	2 to 4 gpm	7.6 to 15.1 lpm
Model 20	over 4 gpm	15.1 lpm

Stainless Steel Airless Foam Wands are machined venturis that draw in atmospheric air to produce wet clinging foam. Designed for pressure washers that are already equipped with a downstream chemical injector. Simply remove the rinse nozzle and quick connect to the trigger gun.

STAINLESS STEEL AIRLESS FOAM WANDS

Airless Foam Wands are machined venturis that draw in atmospheric air to produce wet clinging foam. Designed for pressure washers that are already equipped with a downstream chemical injector.

- Foam is created instantly by the stainless steel venturi airless foam wand
- Foam throw up to 25 ft.
- Choice of two models.

Principals of Operation

- Simply quick connect the stainless steel airless foam wand to the trigger gun

REQUIREMENTS / SPECIFICATIONS

Pressure Washer Flow Rate	min. 1000 psi	min. 68.9 bar
969400	3 to 4 gpm	11.3 to 15.1 lpm
969410	over 4 gpm	15.1 lpm

Model #	Description
969400	A-40 SS Airless Foam Wand
969410	A-45 SS Airless Foam Wand
