

# Acid LC Foamers

Mixing Stations

Sprayers

Foamers

Asphalt Release

Portables

Lafferty Venturi Acid Applicators are designed for use with highly corrosive chemicals like those used in concrete removal and aluminum brightening. LC Foamers draw chemical concentrate directly from original shipping containers, reducing employee exposure to chemicals. Twenty color-coded chemical metering tips provide consistent chemical dilution ratios.

Lafferty Acid LC Foamers produce rich, clinging foam using available water pressures and compressed air. Apply up to three different chemicals, depending on the model.

## Features And Benefits

- Venturi action
- Polypropylene base and cover
- Polypropylene foamer body
- Metering tips
- 40' discharge hose assembly with PVC ball valve and 28" polypropylene foam wand.

Model #	Description
972306	1-Way Acid LC Foamer Complete
972307	2-Way Acid LC Foamer Complete
972308	3-Way Acid LC Foamer Complete

## Requirements / Specifications

Water Pressure	40 - 150 psi	2.8 - 10.3 bar
Water Flow Rate	@ 40 psi	@ 2.8 bar
Discharge Hose		
ID	3/4 in.	19.1 mm
Length	40 ft.	12.2 m
• Compressed air
