315 Sanitizer

MODEL # 973650

OVERVIEW

The 315 Sanitizer is a high volume venturi injection system that uses standard city water pressure (35 - 125 PSI) to draw and blend chemical concentrate into the water stream. Precision metering tips are used to create the lean ratios required for no-rinse sanitizing in food plants. The solution is then projected through the discharge hose and fan nozzle as a 4 GPM coarse spray on to any surface or object.

Key Features

- Creates a high volume, coarse spray
- Dilute concentrated sanitizers to the lean ratios required for no-rinse applications in food plants
- Projects a high volume flooding spray in a fan pattern for complete coverage
- Chemical resistant wetted components ensure years of outstanding performance with minimal maintenance
- Industrial-strength design holds up in tough environments
- Available with a higher flow rate for even leaner dilution ratios (#973750)
- See other Lafferty Spray-Alls and more chemical applicators in Catalog 1

Includes

- Stainless steel mounting bracket
- Stainless steel inlet and discharge ball valves
- Machined polypropylene injector body
- 20 color-coded metering tips to set dilution ratios
- 50' discharge hose, polypropylene wand and stainless steel fan nozzle
