

Portable 5 Gallon 1035 Sanitizer

MODEL # 973965

OVERVIEW

The Portable 5 Gallon 1035 Sanitizer is a water-driven, high volume spray applicator for projecting sanitizer solutions as a flooding spray on to any surface or equipment. Featuring an all stainless steel cart assembly, this unit dilutes chemical concentrate to the lean ratios required for no-rinse sanitizing in food plants. This venturi injection system uses standard city water pressure (35 - 125 PSI) to draw and blend chemical concentrate into the water stream. Precision metering tips are used to create an accurately diluted solution which is projected through the discharge hose and fan nozzle as a 9.4 GPM flooding spray for complete coverage.

Key Features

- Dilutes concentrated sanitizers to the low ratios required for no-rinse applications in food plants
- Projects a high volume flooding spray in a fan pattern for complete coverage
- Chemical resistant wetted components ensure years of outstanding performance with minimal maintenance
- Industrial-strength design holds up in tough environments
- Use it where 35-125 PSI water is available
- Available with a lower flow rate for slower application (#973945)
- See other Lafferty Spray-Alls and more chemical applicators in [Catalog 1](#)

Includes

- All stainless steel 2-wheel cart with non-marking tires & integrated hose rack
- Stainless steel, round, 5 gallon jug rack (square optional)
- Stainless steel inlet and discharge ball valves
- Machined polypropylene injector body
- 20 color-coded precision metering tips to set dilution ratios
- 25' discharge hose, polypropylene wand and stainless steel fan nozzle
