

Magnetic EP-PD Asphalt Release Spray System

MODEL # 977894

OVERVIEW

The Magnetic EP-PD Asphalt Release Spray System is a magnetic sensor activated, time delayed, asphalt release applicator that mounts to a user-supplied drive-through arch for spraying asphalt truck beds. It is designed for facilities with low or no water pressure. This system uses an electric pump to draw ready-to-use chemical from a static tank. When a truck comes into range of the magnetic sensor, a delay timer allows the driver to position the truck under the spray nozzle before spraying begins and a run timer applies release agent for a pre-set time or until the vehicle leaves the spraying area, whichever is first.

Key Features

- The driver remains in his cab and avoids the risk of slip-and-fall injury and chemical waste
- Designed to spray asphalt release chemicals on to truck beds
- An adjustable delay timer allows the driver to position the truck
- Evenly coats the truck bed in just seconds, reducing run-off and chemical waste
- Spraying will stop when the driver leaves the area
- Chemical resistant wetted components ensure years of outstanding performance with minimal maintenance
- See other Lafferty asphalt release equipment and industrial chemical applicators in [Catalog 8](#)

Includes

- Lockable, stainless steel enclosure
- Control box with delay/run timers and magnetic sensor
- 1" Stainless steel pump (110V)
- 40' discharge hose with square spray nozzle
