

633 Miniature 9-Way Fogger

MODEL # 950015

OVERVIEW

The 633 Miniature 9-Way Fogger is a damp mist sprayer that uses compressed air (3.7 CFM @ 80 PSI) and venturi action to draw ready-to-use chemical solution from a nearby container and project it in 9 directions. The adjustable output can wet surfaces at close range or spray mist (fog) into the air to cover exposed surfaces and penetrate hard-to-reach areas. This unique miniature fogger has a short projection distance and can fit into small areas such as wall cavities and aeroponics tables.

Key Features

- Atomizes and sprays chemical solutions using compressed air
- Projects output in 9 directions
- Miniature design fits into small spaces and increases fogger placement opportunities
- Damp fog (mist) fills the air and covers exposed surfaces with chemical, including hard-to-reach areas
- Venturi action draws pre-diluted chemical from a nearby container
- *Optional* metering tips can reduce chemical usage and output wetness
- Chemical resistant CPVC construction ensures durability and years of outstanding performance
- See [Catalog 7](#) for hand held, permanently mounted and portable foggers

Includes

- Machined CPVC Mini 9-Way fogger body
- Metering tip holder/Check Valve
- 6' chemical suction tube and strainer
