

# 1-Hose Ultimate / 1035 Sanitize / Ultimate Foam Hose Drop Station

MODEL # 914150

## OVERVIEW

The Ultimate Foam/1035 Sanitize/Ultimate Foam Hose Drop Station is a combination applicator for applying two chemicals as foam and another as a high-volume, sanitizing spray. This venturi injection system uses standard city water pressure (35 - 125 PSI) to draw and blend 3- compatible chemical concentrates into the water streams to create accurately diluted solutions using precision metering tips to control chemical usage. Rich, clinging foam is created by injecting compressed air into the foaming solutions to greatly increase volume and coverage ability. The foaming solutions are then projected through a single quick disconnect discharge hose and fan nozzle at distances up to 12 feet. The sanitizer solution is projected as a "flooding" spray for fast complete coverage through the same hose.

## Key Features

- Designed to apply 2-foaming chemicals and 1-sanitizing chemical on to medium to large surfaces
- Projects a medium volume of rich, clinging foam which increases chemical contact time and effectiveness
- Foaming expands the chemical and reduces over-application by providing visual assurance of coverage
- Fan pattern foam nozzle for fast coverage (up to 12' range)
- Covers up to 500 sq ft (46.5 sq m) in 2 minutes
- Adjustable foam consistency (wet/dry)
- Dilutes concentrated sanitizers to the lean ratios required for no-rinse applications in food plants
- Sanitizer is projected as a high-volume, "flooding spray" in a fan pattern for complete coverage
- All stainless steel and polypropylene wetted components ensure years of trouble-free performance
- See other city water pressure foamers in [Catalog 1](#)
