

# LAFFERTY SANITIZERS

REQUIREMENTS: 35-100 PSI Water

“Flood” application of sanitizing chemicals has proven to be the most effective method to control Salmonella, Listeria, E. coli, and other pathogens and spoilage bacteria. Lafferty Flood Sanitizers are designed to accurately apply quaternary ammonias, chlorines, acid anionic sanitizers, and detergent solutions.

• **Venturi Action** – Lafferty Sanitizers use pressurized water to draw the sanitizing chemical(s) into the water stream. The included metering tips help provide accurate, “no-rinse” chemical dilution ratios.

- **Easy to Use** – Lafferty Sanitizer bodies have no moving parts to fail. There is no need for electrical wiring or to premix your chemicals.
- **Well-Equipped** – Lafferty Sanitizers Complete are each equipped with a heavy-duty 50’ hose assembly that includes a discharge shutoff valve, rugged polypropylene wand, and a spray nozzle.
- **Meet Your Needs** – Lafferty offers three sanitizer models, each in a different water flow rate, to work with available water pressures and/or volumes.

## WALL MOUNT LAFFERTY 315, 517, AND 1035 SANITIZERS

### Features:

- Chemical Resistant Polypropylene Sanitizer Body
- 20 Color-Coded Metering Tips
- Stainless Steel Wall Mounting Bracket with Hinged Cover
- 50’ Hose Assembly
- Single or 2-Way Chemical Pick-up

### Options

# 288473 Water Regulator Assembly with Gauge – to control fluctuating water pressures

# 224150 Stainless Steel Hose Rack

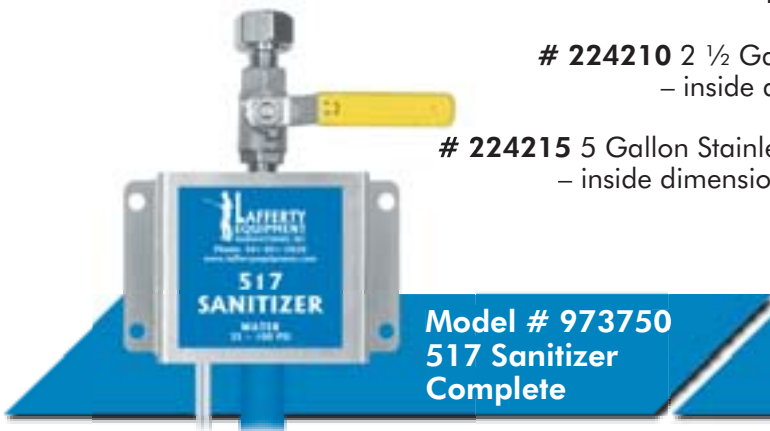

# 224200 round OR # 224205 square  
1 Gallon Stainless Steel Jug Rack

# 224210 2 ½ Gallon Stainless Steel Jug Rack  
– inside dimensions 8 ½” x 10 ½”

# 224215 5 Gallon Stainless Steel Jug Rack  
– inside dimensions 12” x 12”
