

Model 25 Compact Airless Foamer

DURABLE AND HIGH-PERFORMING FOAM GUN (20-100 PSI WATER) - MODEL # 969925-B32

Lafferty Compact Airless Foamers dilute concentrated chemical from the attached bottle to the desired ratio, and project wet clinging foam at distances up to 12 feet (depending on water pressure).

Machined Foamer Body for Unmatched Durability

- Chemical injector and foam wand are combined in one machined polypropylene assembly

Stainless Steel Bracket & Lid Reinforcement Plate

- Impact resistant bottle lid is reinforced with a stainless steel plate and mounting bracket

Optional Spreader Nozzle

- Spreads foam output to allow for more efficient close-range foaming

Lightweight & Durable Polyethylene Bottle (32 oz / 0.94 L)

- Wide mouth for easy filling
- Easier to handle than larger bottles — Reduces risk of wrist and arm fatigue and repetitive strain injuries

Balanced Flow Rate

(1.25 GPM / 4.7 LPM @ 40 PSI)

- Foam twice as long, ounce-for-ounce, as competing models
- Projects the perfect amount of foam to reduce runoff

Other Features and Benefits

- Creates wet, clinging foam
 - Maximizes chemical contact time and effectiveness
 - Provides visual confirmation of coverage and prevents over-application and chemical waste
- Dilution ratio controlled by precision metering tips that allow for ratios from a strong 6:1 to a weaker 286:1 (chart included)
- Works well with water pressure as low as 20 PSI
- Made in the USA – Each unit individually tested
- Color-coded lids help identify chemicals and enhance user safety (blue standard - red, yellow, or green optional)
- Use this unit with a Compact Sprayer to create a Foam / Rinse / Sanitize System (#969955)

Options

- Compact Foamer Spreader Nozzle (#180325)
- Stainless steel ball valve activation (#969930-B32)
- Lower flow rate for close-range foaming (#969920-B32)
- Stainless steel body for pressure washers (#969621-B)

Stainless Steel Quick Disconnect Set for Secure, Leak-Free Connection

- Six-ball socket grips tight
- Easy disconnect to rinse
