WARNING! READ ALL INSTRUCTIONS BEFORE USING EQUIPMENT!

OVERVIEW

The Boot Scrub Station is a device for removing foreign material from footwear as part of a cross-contamination prevention process. The stainless steel scrapers and FDA compliant brushes are ideal for scrubbing footwear prior to sanitizing when entering sensitive areas, or for clearing away particulates and grime that accumulated while working.

SAFETY & OPERATIONAL PRECAUTIONS

- Manufacturer assumes no liability for the use or misuse of this unit.
- For safety during use, anchor the unit to the floor or ground.
- Do not stand on the unit. Always keep one foot on a firm surface while cleaning the boot/shoe of the other foot.
- Grasp the included safety handle during use to prevent falling.
- Use scraping teeth on heavy duty soles, only. The teeth could puncture or tear lightweight material.
- For best results, clean/rinse debris from brush bristles and scraping teeth after each use.
