2-Way FPV-PD Concrete Foamer

MODEL # 933604-V

OVERVIEW

The 2-Way FPV-PD Concrete Foamer is a foam applicator for projecting 2 highly corrosive chemicals such as those used to remove concrete and for aluminum brightening. This acid-resistant system uses a cost-effective Flojet air-operated, double-diaphragm pump to draw 2 ready-to-use acid solutions from static tanks and inject compressed air to greatly increase volume and coverage ability. Rich, clinging foam is projected through the hose, wand and fan nozzle on to any surface. Use the ball valves to apply the chemicals separately or simultaneously.

Key Features

- Cost-effective Flojet AODD pump (Viton diaphragms)
- Draws 2 different ready-to-use chemicals or 2 different ratios of the same chemical from static tanks
- Projects the 2 chemicals separately or simultaneously
- Projects rich, clinging foam which increases chemical contact time and effectiveness
- Foaming expands the chemical and reduces over-application by providing visual assurance of coverage
- The foamer body optimizes the volume and produces the ideal amount of foam to avoid excessive run-off
- Fan pattern nozzle for quick coverage
- Adjustable foam consistency (wet/dry)
- Corrosion resistant wetted components ensure durability and years of reliable service
- Available for one chemical (#933602-V)
- See other Lafferty acid sprayers and foamers in Catalog 8
