1-Hose Uni-Body Rinse / LC Foam System

MODEL # 975614

OVERVIEW

The 1-Hose Uni-Body Rinse / LC Foam System is a two function cleaning system with a medium volume foamer. This venturi injection system uses standard city water pressure (35 - 125 PSI) to draw and blend chemical concentrate into the water stream to create an accurately diluted solution. Rich, clinging foam is created by injecting compressed air into the solution to greatly increase volume and coverage ability. The foam is then projected through the discharge hose and fan nozzle at distances up to 12 feet. Rinse through the same hose and nozzle, or use an optional more powerful rinse nozzle.

Key Features

- Designed to foam and rinse medium to large surfaces and objects
- One discharge hose and nozzle for both functions
- Projects rich, clinging foam which increases chemical contact time and effectiveness
- Foaming expands the chemical and reduces over-application by providing visual assurance of coverage
- Fan pattern foam nozzle (up to 12' range)
- Covers up to 500 sq ft (46.5 sq m) in 2 minutes
- Adjustable foam consistency (wet/dry)
- Rinse through the foam nozzle, or use an optional quick disconnect rinse nozzle to reduce volume and project a more forceful rinse
- The Uni-Body design is compact, cost-effective and easy to maintain
- Stainless steel and polypropylene components ensure years of trouble-free performance
- Available with a sanitize function (#975636)
- See other city water pressure foamers in Catalog 1

Includes

- Machined polypropylene manifold and body
- Easy-to-read pressure gauges for incoming water and air
- 20 color-coded precision metering tips to set dilution ratios
- 40' discharge hose
- Stainless steel ball valve, polypropylene wand and fan nozzle
