Anticipatory Strobe Light Upgrade For Entryway Foam Sanitizers

MODEL # 976001SL

OVERVIEW

The Anticipatory Strobe Light Upgrade allows any Venturi Timed Entryway Foam Sanitizer to activate a strobe light and provide warning of foamer activation. The dual multi-function timers also control the minimum amount of time between activation, preventing costly over-application when traffic is heavy. Timer settings are field adjustable. This upgrade must be specified at the time of purchase.

Key Features

- Must be specified at time of purchase of designated Entryway Sanitizing Systems
- Factory installed -- Replaces standard control box and adds a remote, warning strobe light
- Industrial grade strobe: reinforced against vibration and shock; sealed against dirt and moisture
- Amber strobe emits a double micro-burst each second
- Enhances safety – Alerts personnel to imminent chemical application to a doorway floor
- Adjustable length of application and delay time prevents costly over-application
- NEMA rated box with hinged lid with gasket and lockable latch protects electrical components and settings
- Controls operation of strobe and chemical application
- Simple-to-set rotary timer faces

Includes

- NEMA rated, lockable control box
- Auto/Off/Manual rocker switch
- Two, field-programmable, dual function timers
- Amber strobe light
- 10' electrical cable for strobe
- Water activation solenoid
- Air activation solenoid
- 8' power supply cord
- Instructions (incorporated with entryway system instructions)

REQUIREMENTS

Electric	120V
Entryway Foam Sanitizer	976500, 976505, 976530, or 976560

APPLICATIONS

- Agriculture/Horticulture
- Animal Health
- Food & Beverage
- Hatchery
- Industrial
- And many more applications!
