

# Bullet™ Foamer

MODEL # 935105

## OVERVIEW

The Bullet™ Foamer is a low volume foam applicator that is ideal for applying foaming chemicals to close-up surfaces and hard to reach areas. A Flojet air-operated, double-diaphragm pump draws ready-to-use chemical from one static tank or blends water and chemical concentrate from two static tanks to create a wide range of dilution ratios. The solution is then projected through the discharge hose, extended wand and Bullet™ nozzle which draws in atmospheric air to create wet, clinging foam. This unique nozzle can be adjusted to project a wide or narrow foam pattern.

## Key Features

- Lafferty's adjustable Bullet™ Airless Foam Nozzle
- Can draw ready-to-use chemical solution or blend water and chemical concentrate on the fly
- Projects a low volume of rich, clinging foam which increases chemical contact time and effectiveness
- Foaming expands the chemical and reduces over-application by providing visual assurance of coverage
- Adjustable foam consistency (wet/dry)
- Has a low compressed air requirement and can be powered by a small 110V compressor
- Chemical resistant wetted components ensure durability and years of reliable service
- Available with a trigger gun and fan nozzle (#935115)
- See other air-operated foamers and sprayers in [Catalog 4](#)
