# 455 2-Way Fogger

## MODEL # 950202

## **OVERVIEW**

The 455 2-Way Fogger is a dry mist sprayer that uses compressed air (35 CFM @ 80 PSI) and venturi action to draw ready-to-use chemical solution from a nearby container and project it up to 35 feet in opposite directions. The adjustable output sprays mist (fog) into the air to cover exposed surfaces and penetrate hard-to-reach areas.

#### **Key Features**

- Atomizes and sprays chemical solutions using only compressed air
- Venturi action draws pre-diluted chemical from a nearby container
- Projects up to 35' in opposite directions
- Dry fog (mist) fills the air and covers exposed surfaces with chemical, including hard-to-reach areas
- 455 foggers produce drier output, without adjustments, compared to other fogger series (633, 305, etc.)
- Optional metering tips can further reduce chemical usage and output wetness
- Chemical resistant polypropylene construction ensures durability and years of outstanding performance
- See Catalog 7 for hand held, permanently mounted and portable foggers
- Use the Lafferty Fogger Planning Tool to design the optimal fogging system for any facility

#### Includes

- Machined polypropylene fogger body
- (2) Metering tip holders
- 10' chemical suction tube and strainer
