

324 8-Way Fogger

MODEL # 950308

OVERVIEW

The 324 8-Way Fogger is a chemical atomizer that uses compressed air (120 CFM @ 80 PSI) and venturi action to draw ready-to-use chemical solution from a nearby container. It will atomize the solution and project it as large, "wet" fog particles in 8 directions at distances up to 30 feet.

Key Features

- Atomizes chemical solutions using only compressed air
- Venturi action draws pre-diluted chemicals
- Projects "wet" fog particles up to 30' in 8 opposite directions
- *Optional* chemical needle valve allows the user to refine the particle size
- Chemical pickup can be installed on the top or bottom, expanding the options for mounting the unit
- Chemical resistant polypropylene construction ensures durability and years of outstanding performance
- See [Catalog 7](#) for hand held, permanently mounted and portable foggers
- Use the Lafferty [Fogger Planning Tool](#) to design the optimal fogging system for any facility

Includes

- Machined polypropylene fogger body
- Metering tip holder
- 10' chemical suction tube and strainer
