

BPSS Foam / Rinse / BPSS Foam Hose Drop Station

MODEL # 912143

OVERVIEW

The BPSS Foam / Rinse / BPSS Foam Hose Drop Station is a combination system that applies one chemical as foam, rinses, and applies a second chemical as foam. This venturi injection system uses boosted water pressure (125 - 350 PSI) to draw and blend chemical concentrates into the water streams to create accurately diluted solutions using precision metering tips to control chemical usage. Rich, clinging foam is created by injecting compressed air into the foaming solution to greatly increase volume and coverage ability. The foaming solution is then projected through the foam hose and fan nozzle at distances up to 13 feet. Rinse at full pressure using the adjustable spray pattern trigger gun.

Key Features

- Designed to foam, rinse and foam medium to large surfaces and objects
- Two independent foamer bodies for separate foaming chemicals
- Quick-connect hose can be moved between foamer bodies
- Projects a medium volume of rich, clinging foam which increases chemical contact time and effectiveness
- Foaming expands the chemical and reduces over-application by providing visual assurance of coverage
- Fan pattern foam nozzle for fast coverage (up to 13' range)
- Covers up to 500 sq ft (46.5 sq m) in 1 minute
- Adjustable foam consistency (wet/dry)
- Rinse using the trigger gun with an adjustable cone/stream spray pattern
- All stainless steel components ensure durability and years of trouble-free performance
- See other boosted water pressure foamers in [Catalog 2](#)

Includes

- Stainless steel mounting bracket
- Stainless steel inlet ball valves
- Machined stainless steel foamer bodies with quick-connect plug discharges
- 20 color-coded precision metering tips to set dilution ratios
- Quick-connect 50' Foam hose, polypropylene foam wand and fan nozzle
- 50' rinse hose & heavy duty trigger gun
