

2-Way 315 Sanitizer

MODEL # 973652

OVERVIEW

The 2-Way 315 Sanitizer is a high volume spray applicator for projecting 2 sanitizer solutions as a heavy spray on to any surface or equipment. With a high flow rate, this unit dilutes chemical concentrates to the lean ratios required for no-rinse sanitizing in food plants. This venturi injection system uses standard city water pressure (35 - 125 PSI) to draw and blend chemical concentrate into the water stream. Precision metering tips are used to create an accurately diluted solution which is projected through the discharge hose and fan nozzle as a 4 GPM coarse spray. Use the chemical ball valves to inject the 2 chemicals separately or simultaneously.

Key Features

- Dilutes concentrated sanitizers to the lean ratios required for no-rinse applications in food plants
- Designed to apply 2 separate chemicals or 2 different concentrations on the same chemical
- Chemicals can be applied separately or simultaneously by adjusting the ball valves
- Projects a high volume flooding spray in a fan pattern for complete coverage
- Chemical resistant components ensure years of outstanding performance with minimal maintenance
- Industrial-strength design holds up in tough environments
- Use it where 35-125 PSI water is available
- Available with a higher flow rate for even leaner dilution ratios (#973752)
- See other Lafferty Spray-Alls and more chemical applicators in [Catalog 1](#)
