Rinse / Pump Fed Airless Foam Hose Drop Station

MODEL # 920918

OVERVIEW

The Rinse / Pump Fed Airless Foam Hose Drop Station is a combination medium volume foam applicator for projecting ready-to-use foaming chemicals on to any surface up close or at a distance and for rinsing, without compressed air. This unit receives ready-to-use chemical solution from a central chemical feed system and projects it through the discharge hose to the "airless" foam wand which draws in atmospheric air to create and project wet, clinging foam at distances up to 6 feet. Rinse at full pressure through a separate hose and unique, powerful 4-hole nozzle.

Key Features

- No compressed air required
- Receives ready-to-use chemical solution from a central chemical feed system
- Designed for foaming & rinsing medium to large surfaces
- Projects wet, clinging foam which increases chemical contact time and effectiveness
- Foaming expands the chemical and reduces over-application by providing visual assurance of coverage
- Projects foam up to 6' (depending on solution pressure)
- Chemical resistant wetted components ensure years of outstanding performance with minimal maintenance
- Available without a rinse function (#920905)
- See other Lafferty pump fed foamers in Catalog 5
- Design the optimal central chemical feed system with the Lafferty Pump-Fed Central System Planning Tool

Includes

- Stainless steel mounting bracket
