

WR-4 2-Way Foam / Rinse / 2-Way Sanitize With Pistol Grip Gun Kit

MODEL # 975243

OVERVIEW

The WR-4 2-Way Foam/Rinse/2-Way Sanitize System is a combination applicator featuring chemical pickups for two foaming chemicals and two sanitizers which can be applied separately or simultaneously. This venturi injection system uses standard city water pressure (35 - 125 PSI) to draw and blend chemical concentrate into the water stream to create an accurately diluted solution. The foaming solutions then flow through the discharge hose to the airless foam wand which draws in atmospheric air to create and project wet, clinging foam on to any surface up close or at distances up to 6 feet. Quick connect the pistol grip gun to apply sanitizers or to rinse at full pressure.

Key Features

- Designed for foam cleaning, rinsing and sanitizing medium to large sized areas where compressed air is not available
- Projects wet, clinging foam which increases chemical contact time and effectiveness
- Foaming expands the chemical and reduces over-application by providing visual assurance of coverage
- Quick connect the pistol grip gun to rinse at full pressure and to apply sanitizer as a fan pattern spray
- Use ball valves to alternate 2 different foaming chemicals and 2 different sanitizers or use different dilution ratios of the same chemicals
- Chemical resistant components ensure years of outstanding performance with minimal maintenance
- Use it where 35-125 PSI water is available
- Water pressure gauge eliminates guessing, reduces set-up time, and helps with troubleshooting
- See other Foam/Rinse/Spray systems in [Catalog 12](#)
